Dreamweaver CS4 Getting Started
with: [James Williamson](#) [course feedback](#)

James Williamson provides a practical introduction to Adobe's do-it-all web design and development tool in *Dreamweaver CS4 Getting Started*. He shows how to generate standards-compliant XHTML and CSS, as well as rock-solid PHP, ColdFusion, ASP, AJAX, and more, using Dreamweaver's developer-friendly Code view and WYSIWYG Design view. From creating basic page layouts to embedding multimedia, James shares techniques for publishing a finished site quickly and efficiently. Example files accompany the course.

Released on: 9/30/2008
